Solenoid actuator for butterfly valves

for staged control of air and gas in combustion processes

Attuatore elettromagnetico per valvole a farfalla

per il controllo a step del flusso di aria e gas nei processi di combustione

Magnetantrieb für Drosselklappe

zur stufigen Regelung von Luft und Gases an Industriebrennern.

Entraînement magnétique pour vannes papillon

pour régulation étagée de l'air et de le gaz sur des brûleurs industriels

Actuador electromagnético para válvulas de mariposa

para la regulación escalonada de aire y gas en quemadores industriales

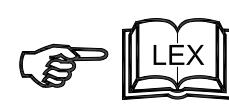

Привод соленоида для клапан-бабочек

для поставленного управления воздуха и газа в процессах горения

Installation and Service Instructions

Istruzioni di Installazione e Servizio

Einbau- und Betriebsanleitung

To assure a proper and safe operation, as well as a long life of the valve, the installation procedure and a periodical servicing are very important topics.
Read carefully and keep in a safe place.

Per assicurare un funzionamento idoneo e sicuro, come pure una lunga vita della valvola, le operazioni di installazione e manutenzione periodica sono un aspetto fondamentale.
Leggere attentamente e conservare in un luogo sicuro.

Um einen korrekten und sicheren Betrieb, sowie eine lange Lebensdauer des Ventils sicherzustellen, ist es wichtig, die Installationsanleitung besonders zu beachten und eine regelmäßige Wartung sicherzustellen.
Bitte studieren Sie die Anleitung sorgfältig und bewahren Sie diese an einem sicheren Platz auf.

Pour assurer une exploitation sûre appropriée et, comme une longue vie de la valve, la procédure d'installation et un service périodique sont des matières très importantes.
Lisez soigneusement et maintenez dans un endroit sûr.

Para asegurar una operación apropiada y segura, tan bien como una larga vida de la válvula, el procedimiento de instalación y un mantenimiento periódico son asuntos muy importantes.
Lea cuidadosamente y mantenga en un lugar seguro.

Для того чтобы убедить правильной и безопасной деятельности, так же, как длинная жизнь клапана, процедура по установки и периодический обслуживать очень важные темы.
Прочитайте тщательно и сдержите в безопасном месте.

This control must be installed in compliance with the rules in force.
All works must be executed by qualified technicians only.

Questo controllo deve essere installato in accordo con le leggi in vigore.
Tutti i lavori devono essere eseguiti da personale qualificato.

Dieses Sicherheitsventil muß in Übereinstimmung mit den geltenden Vorschriften installiert werden.
Alle Arbeiten dürfen nur von qualifizierten Technikern ausgeführt werden.

Ce matériel doit être installé en accord avec les lois en rigueur.
Tous les travaux doivent être exécutés par les techniciens qualifiés seulement.

Este material se debe instalar de acuerdo con las normas en vigor.
Todos los trabajos se deben ejecutar por los técnicos calificados solamente.

Это управление необходимо установить в согласии с правилами в усилие.
Все работы необходимо выполнить квалифицированными техниками только.

**Comply with the essential requirements of 2006/95/EC and 2004/108/EC Directives.
VF type complies with the essential requirements of Gas Appliances Directive (2009/142/EC), according to EN 13611**

**Conforme ai requisiti essenziali delle Direttive 2006/95/CE e 2004/108/CE.
Tipo VF conforme ai requisiti essenziali della Direttiva sulle Apparecchiature a Gas (2009/142/CE), secondo la EN 13611**

**Das Produkt erfüllt die wesentlichen Anforderungen der Geräterichtlinie 2006/95/EG und 2004/108/EG.
Der Typ VF erfüllt die wesentlichen Anforderungen der Gas-Geräterichtlinie (2009/142/EG), entsprechend EN 13611**

**Se conform aux exigences essentielles des Directives 2006/95/CE et 2004/108/CE.
Le type VF est se conforme aux exigences essentielles de la Directive d'appareils à gaz (2009/142/CE), selon EN 13611**

**Cumplen con los requisitos básicos de las Directivas 2006/95/CE y 2004/108/CE.
El tipo VF es se conforme con los requisitos esenciales de la Directiva de las aplicaciones de gas (2009/142/CE), según EN 13611**

**Следуйте основным обязательным требованиям следующих директив 2006/95/EG и 2004/108/EG.
Тип VF исполняет с необходимыми требованиями директивы приборов газа (2009/142/EC) - испытанного и аттестованного согласно EN 13611**

IMPORTANT: before proceeding with the installation, ensure that all the features of your system comply with the specifications of the valve (connections, media type, operating pressure, flow rate, temperature range, electrical voltage, etc.).

IMPORTANTE: prima di procedere con l'installazione, assicurarsi che tutte le caratteristiche del vostro sistema siano compatibili con le specifiche della valvola (connessioni idrauliche, tipo di fluido, pressione di esercizio, portata, campo di temperatura, voltaggio, etc.).

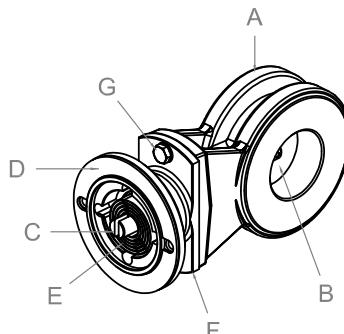

WICHTIG: Bevor Sie mit der Installation beginnen, stellen Sie sicher, dass alle Anlageneigenschaften mit den Spezifikationen des Ventils übereinstimmen (Anschlüsse, Gasart, Betriebsdruck, Strömungsgeschwindigkeit, Temperaturbereich, elektrische Spannung, etc.).

IMPORTANT: avant de procéder à l'installation, assurez-vous que tous les dispositifs de votre système sont se conformant aux caractéristiques de la valve (raccordements, type de gaz, pression de fonctionnement, débit, température ambiante, tension électrique, etc.).

IMPORTANTE: antes de proceder con la instalación, asegúrese de que son todas las características de su sistema se conforman con las especificaciones de la válvula (conexiones, tipo de gas, presión de funcionamiento, flujo, gama de temperaturas, tensión eléctrica, etc.).

ВАЖНО: перед продолжать с установкой, обеспечьте что все характеристики вашей системы исполнят с спецификациями клапана (соединений, типов носителя, работая давления, расхода потока, диапазона температур, электрического напряжения тока, etc.).

VF type

- A - Valve housing (VF or VFH)
 B - Valve disc (VF or VFH)
 C - Driving shaft (VF or VFH)
 D - Gasket
 E - Spiral spring
 F - Adapting flange (VF)
 G - Hex screws with washers (VF)
 H - Actuator housing
 I - Solenoid
 J - Hydraulic brake (SL or ST)
 K - Terminal box
 L - Floating coupling
 M - Socked head screws
 N - Dissipation plate (2x)
 O - Bent plate (2x)
 P - Screw with nut (2x)

TECHNICAL DATA

See product label

Connections: between two flanges EN 1092 VF from DN40 up to DN150 with one or two reductions
VF from DN40 up to DN150 with one or two reductions
VFH from DN40 up to DN100

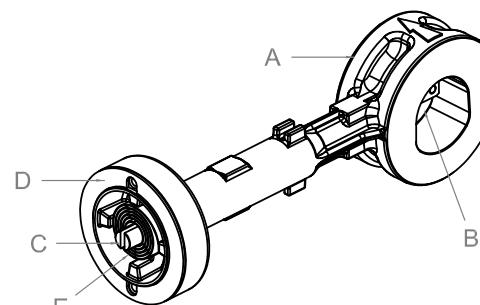

Media type:
VF air and non-aggres. gases up to 60°C air up to 200°C (R version)
VFH air and flue gas up to 250°C with dissipation plates 450°C

Operating pressure: VF 0.500 mBar VFH 0.150 mBar

Ambient temperature: -15°C..+60°C

Operation: SR: 1s opening/closing
 SL: ~4s opening / 1s closing
 ST: ~4s opening/closing

VFH type

- A - Corpo valvola (VF o VFH)
 B - Disco farfalla (VF o VFH)
 C - Stelo di comando (VF o VFH)
 D - Guarnizione
 E - Molla a spirale
 F - Flangia di adattamento (VF)
 G - Viti esagonali con rondelle (VF)
 H - Corpo attuatore
 I - Bobina
 J - Ammortizzatore idraulico (SL o ST)
 K - Scatola di connessione
 L - Giunto flottante
 M - Viti a cava esagonale
 N - Lamiera dissipatrice (2x)
 O - Fascetta sagomata (2x)
 P - Vite con dado (2x)

DATI TECNICI

Vedere targhetta sul prodotto

Connessione: tra due flange EN 1092 VF da DN40 a DN150 con una o due riduzioni
VFH da DN40 a DN100

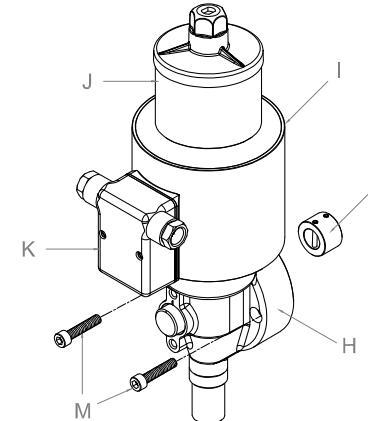

Tipo fluido:
VF aria e gas non aggressivi fino a 60°C aria fino a 200°C (versione R)
VFH aria e gas combusti fino a 250°C con dissipatori fino a 450°C

Pressione di esercizio: VF 0.500 mBar VFH 0.150 mBar

Temperatura ambiente: -15°C..+60°C

Azionamento: SR: 1s apertura/chiusura SL: ~4s apertura/ 1s chiusura ST: ~4s apertura/chiusura

Solenoid Actuator SR./SL./ST..

- A - Corps de valve (VF ou VFH)
 B - Disque de valve (VF ou VFH)
 C - Arbre de trainement (VF ou VFH)
 D - Garniture
 E - Ressort en spirale
 F - Bride de adaptation (VF)
 G - Vis hexagonal avec des rondelles (VF)
 H - Corps de le actionneur
 I - Bobine
 J - Amortissement (SL ou ST)
 K - Boîte de connexion
 L - Accouplement
 M - Vis avec hexagone intérieur
 N - Tôle dissipatrice (2x)
 O - Verbogene Platte (2x)
 P - Vis avec l'écrou (2x)

TECHNISCHE DATEN

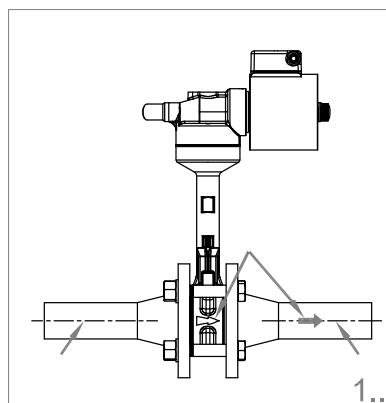

Siehe Typenschild

Anschlüsse: zwischen 2 Flansche EN 1092 VF von DN40 bis zu DN150 mit einem oder zwei Reduktionen
VFH von DN40 bis zu DN100

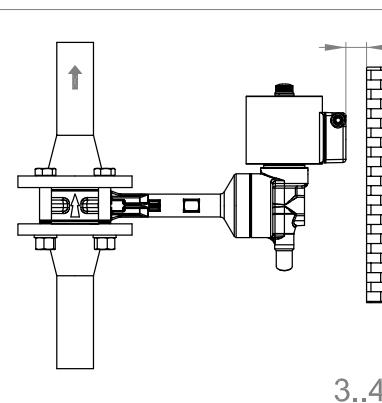

Gasart:

VF

VFH

1.2

3.4

When using VF type with gas, perform leak test after mounting.

Max. testing pressure 1.5 Pmax

WIRING (11..16)

Should cables pass through originally closed opening, use the rubber capsule placed underneath the cap to close any other opening.

Standard plug version (17..23)

Se la valvola VF è utilizzata per gas eseguire un test funzionale e di tenuta dopo l'installazione.

Pressione massima di test 1.5 Pmax

CABLAGGIO (11..16)

Qualora il passaggio dei cavi avvenga attraverso il foro originariamente chiuso, usare la pastiglia in gomma presente sotto il passacavo per chiudere l'eventuale altro foro rimasto aperto.

Versione con connettore (17..23)

Bei Verwendung des Typs VF mit Gas, führen Sie Leck und Funktionsprüfungen nach der Montage durch.

Max. Prüfungsdruck 1.5 Pmax

VERDRAHTEN (11..16)

Falls die Kabel durch eine andere Öffnung geführt werden sollen, so ist eine eventuell nicht verschlossene Öffnung mit dem mitgelieferten Gummistöpsel zu verschließen.

Normsteckdose (17..23)

Si la valve VF est utilisée pour gaz, exécutez les essais fonctionnels et d'étanchéité après le montage.

Pression d'essai maximale 1.5 Pmax

CÂBLAGE (11..16)

Dans le cas où l'on effectue le passage des câbles à travers le trou qui était à l'origine fermé, pour fermer l'autre trou resté ouvert, utiliser la pastille en caoutchouc qui se trouve sous le bouchon.

Version avec prise standard (17..23)

Si usa el tipo de VF con el gas, realice la prueba de estanquidad y funcionales después del montaje.

Presión de prueba máxima 1.5 Pmax

CABLEADO (11..16)

En el caso en que se haga el paso de los cables por el agujero que estaba originalmente cerrado, para cerrar el otro que queda abierto, utilizar la pastilla de caucho que se encuentra bajo el tapón.

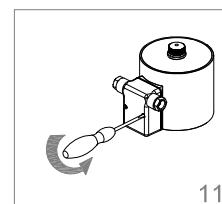

Base para conexión normal (17..23)

Если вы используете тип VF с газом, выполните утечку и функциональные испытания после установки. Максимального давления испытания 1.5 Pmax

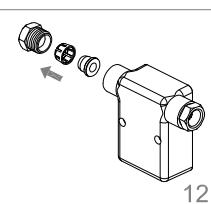

ЭЛЕКТРИЧЕСКАЯ ПРОВОДКА (11..16)

Для изоляции неиспользуемого ввода кабеля в клеммную колодку используйте резиновую мембрану, расположенную под крышкой

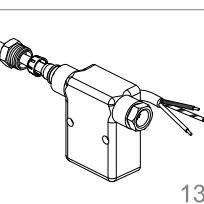

Стандартная штекельная (17..23)

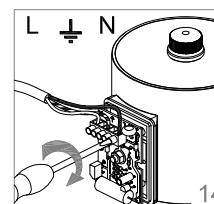

11

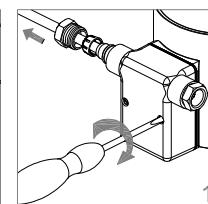

12

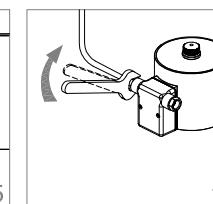

13

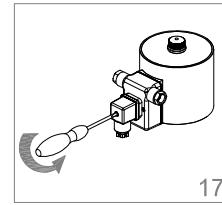

14

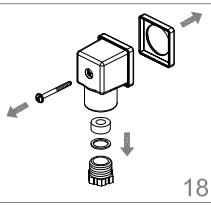

15

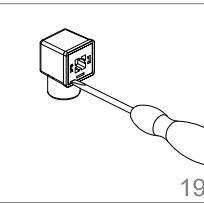

16

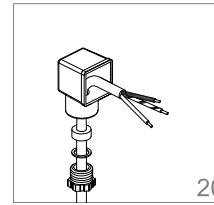

17

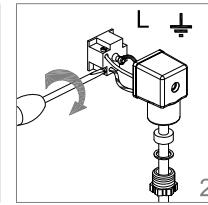

18

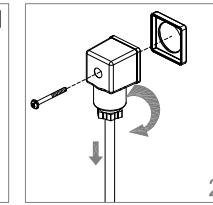

19

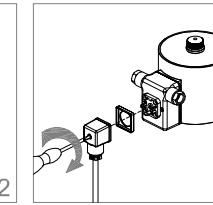

20

21

22

23

CAUTION: The continuous service causes inevitable coil heating, depending on working environment and voltage.

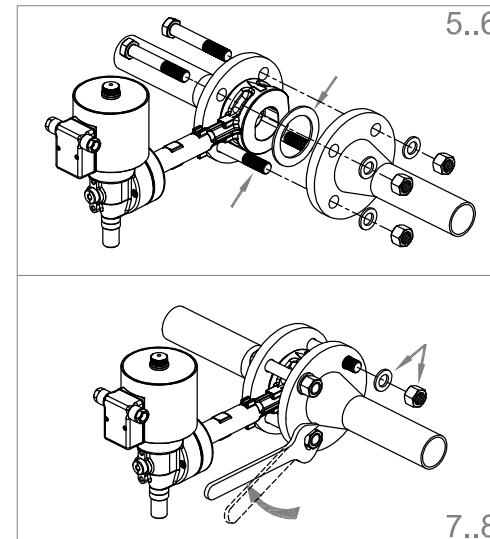

ATTENZIONE: Il servizio continuo provoca il riscaldamento della bobina, che dipende dall'ambiente di lavoro e dal voltaggio.

VORSICHT: Der Dauerbetrieb verursacht unvermeidliche Spulenerhitzung, abhängig von Arbeitsbereich und Spannung.

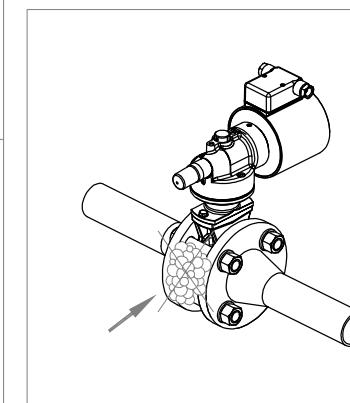

ATTENTION : Le service continu cause le chauffage inévitable d'enroulement, selon le milieu de travail et la tension.

PRECAUCIÓN: El servicio continuo causa la calefacción inevitable de la bobina, dependiendo del ambiente de trabajo y del voltaje.

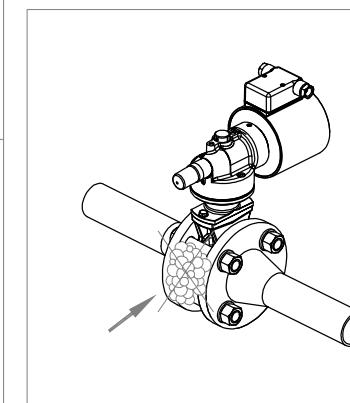

ПРЕДОСТОРЕЖЕНИЕ: Непрерывное обслуживание причиняет неизбежное топление катушки, в зависимости от рабочей Среды и напряжения тока.

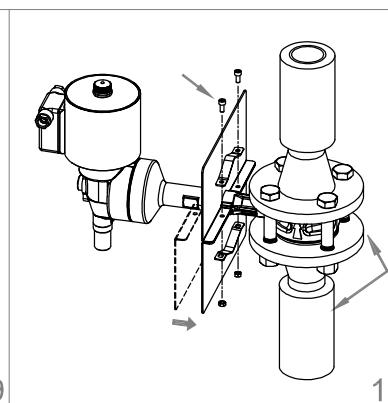

5..6

7..8

9

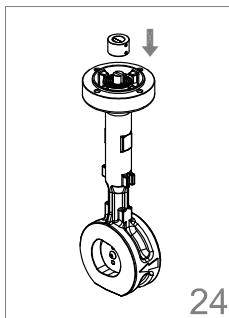

10

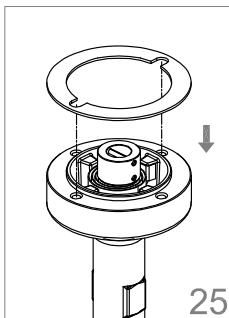

T > 250°C

ASSEMBLING (24..28)

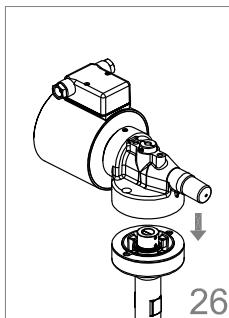

If the valve and the actuator are delivered separately or it is necessary to mount the actuator 90° turned, do as showing:

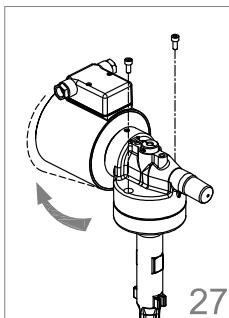

24

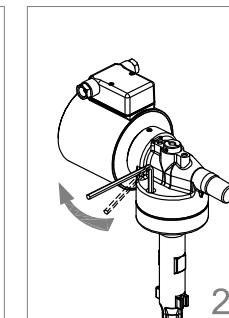

25

26

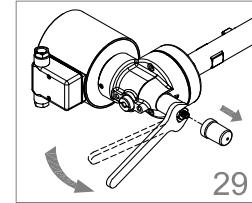

27

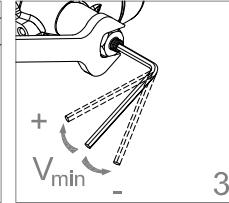

28

ADJUSTMENT

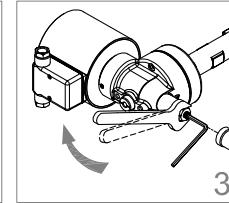

- Vmin (29..31)
- Vmax fast (32..35) / slow (36..38)

29

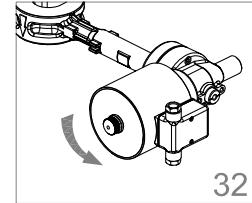

30

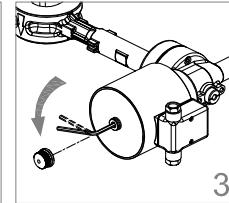

31

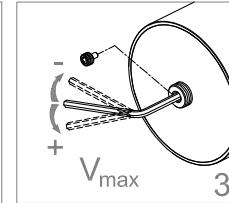

(31, 35)
When adjustments are completed, screw back the locking nut (pin).
Ultimate le regolazioni riavvitare il dado (grano) di blocco
Nach der Einstellung setzen Sie die Verriegelung zurück.
Quand l'ajustement est accompli, revisser l'écrou de blocage (cheville).
Cuando se termina el ajuste, atornille detrás el pasador de fijación.
Когда регулировка завершена, привиньте назад фиксируя шпонку.

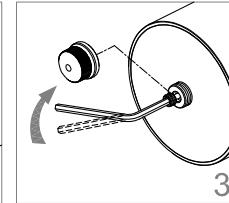

32

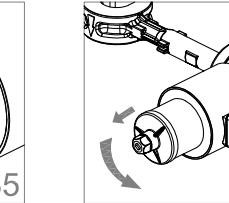

33

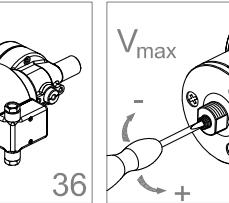

34

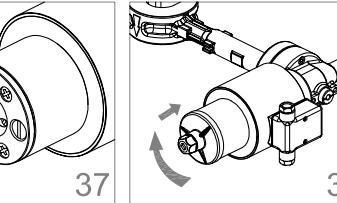

35

36

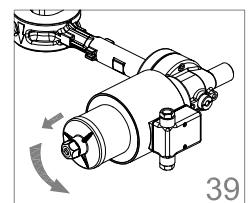

37

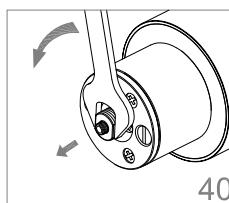

38

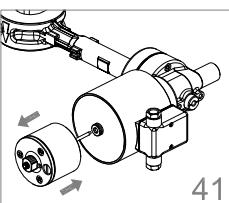

HYDRAULIC BRAKE REPLACEMENT (39..43)

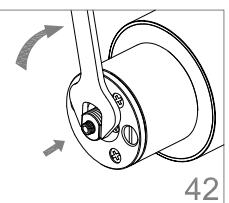

39

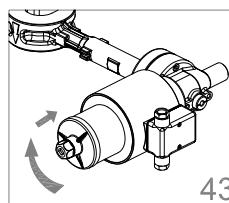

40

41

42

43

SOLENOID REPLACEMENT (44..46)

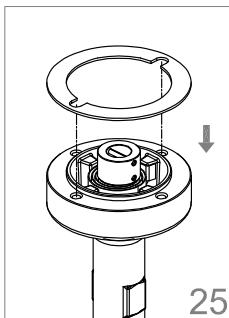

If actuator is the slow opening type, remove the hydraulic brake as showed at 39..43.

MAINTENANCE

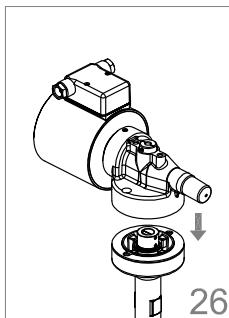

- Perform a function check once a year.
- Depending on the media pollution, perform the disc cleaning.

ASSEMBLAGGIO (24..28)

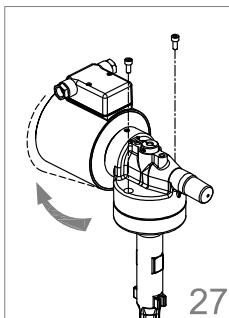

Nel caso in cui la valvola sia stata fornita separatamente dall'attuatore o vi sia la necessità di montare l'attuatore ruotato di 90° rispetto alla valvola, procedere come segue:

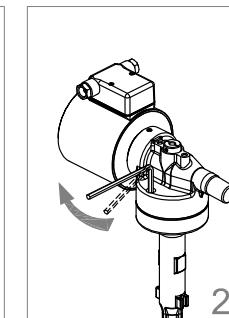

25

26

27

28

ZUSAMMENBAUEN (24..28)

Wenn das Ventil und der Auslöser separat geliefert werden, oder es erforderlich sein sollte, den Auslöser 90° anzubringen gedreht, tun Sie, wie darstellend:

ASSEMBLAGE (24..28)

Si la valve et l'entraînement magnétique sont livrés séparément ou il est nécessaire de monter le déclencheur 90° tourné, faites comme en montrant :

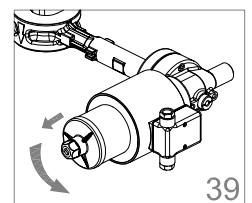

ENSAMBLAJE (24..28)

Si la válvula y el actuador se entregan por separado o es necesario montar el actuador el 90° dado vuelta, haga como demostrando:

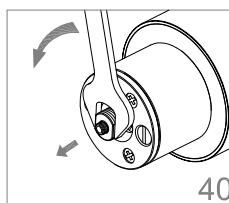

СОБИРАТЬ (24..28)

Если клапан и привод поставлены отдельно или необходимо установить привод повернутое 90°, то сделайте как показывающ:

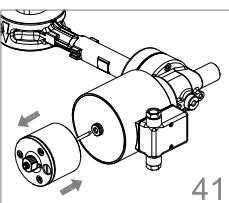

SOSTITUZIONE AMMORTIZZATORE (39..43)

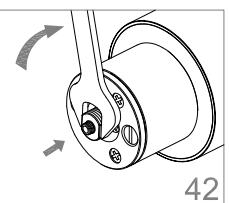

39

39

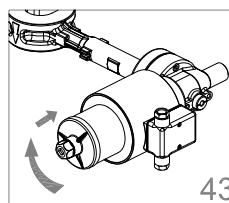

40

41

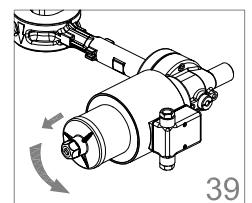

42

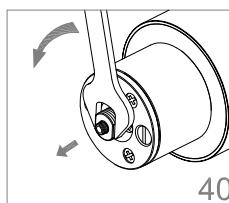

43

SOSTITUZIONE BOBINA (44..46)

WECHSEL DER SPULE (44..46)

Nel caso di attuatore ad apertura lenta è necessario rimuovere l'ammortizzatore come illustrato ai punti 39..43.

MANTENIMENTO

- Effettuare un controllo del funzionamento una volta l'anno.
- In funzione al grado di contaminazione del fluido, eseguire la pulizia del disco.

MANUTENZIONE

- Führen Sie einmal jährlich eine Funktionsüberprüfung durch.
- Bei Bedarf reinigen Sie die Ventilklappe.

WARTUNG

- Effectuez un contrôle de fonctionnement une fois par an.
- En fonction de la pollution de l'air, il peut être nécessaire de nettoyer le disque papillon.

MANTENIMIENTO

- Realice un control de funcionamiento una vez al año.
- Según sea el grado de suciedad del aire puede ser necesario limpiar la chapaleta de la válvula.

MANTENIMENTO

- Выполните проверку функции раз год.
- В зависимости от загрязнения среды, выполните чистку диска.
